Assignment Time!

Assignment // Starting up

You should all have the app downloaded by now.

Go to the reactjs folder:

cd reactjs

Install the needed modules

npm install

Start the project

npm run start

Assignment // Starting up

The browser should start automatically, if not open your browser and go to:

localhost:3000

We will be working in the files App.js, App.css in the reactjs/src/exercise folder

The data can be found in /data

React // JSX

```
function App() {
 const name = 'Rory';
 const intro = <h1>Hello World, my name is {name}</h1>; // Output: Hello World, my name is Rory

 return (
   <div>{intro}</div>
);
```

Assignment // Trying out JSX

- Play around with JSX
- Using the intro and paragraph example, create your own short 'hello world'.
  - Try using strings
  - Try using numbers
  - Use HTML paragraph, headers (h1-h6)
  - Combine the two data types e.g: {age} {years}
  - Try to create a math equation!
- We will get into 'for loops' later!
